Github Project being Reviewed: AndrewWillett

Category	Full Marks (3 Points)	Partial Credit (2 Points)	Partial Credit (1 Points)	No Marks (0 Points)	Score
Quality of Outline	<mark>Outline is correct, clear, and mostly complete. Any notes are clear and intelligible.</mark>	Outline is mostly correct, clear, and mostly complete. Some notes are vague or irrelevant.	Outline is missing substantial parts.	No outline is given.	**3**
Comments (e.g. Give an example of what could be improved. How can the outline be improved?, etc.)	Overall, the outline showed the scope of the project, and I was able to get a clear understanding of what was going to be done. I think there could have been a little more detail on the steps and some of the things you wanted to go over. An example is any questions that you want to look at before diving into the data (e.g. how do free throws affect winning percentage?).				
Intellectual Merit	<mark>The research outlined looks interesting, creative, and/or substantial.</mark>	The research outlined is interesting, creative, and/or substantial, but does not seem feasible to do in a semester.	The research outlined lacks substantial complexity.	No outline is given or the outline is too vague to determine if the research has merit.	**3**

Comments (e.g. Give an example of what could be improved. If the project is too complex, what parts of the project could feasibly done? If the project is too simple, what features could be added?)	I think that there is a lot that could be done with more than semester's worth of time. However, there is a lot that you can get done within the semester. I think you picked an interesting topic that you seem to be really excited about working on. I think that with all the different graphs and models it isn't too complex or too simple. One thing that could be improved would be to do some comparisons between the years or even between another sport (e.g., professional basketball).				
Video	The video gives a helpful, clear depiction of the project.	The video gives a helpful, clear depiction of the project, but is confusing or vague in parts.	The video does not give a helpful, clear depiction of the project.	The video is missing or is inappropriate.	3
Comments (e.g. Give constructive feed back to help improve the presentation style.)	I think that the video gave a nice overview of the project with detailed examples. The only thing I noticed was sometimes you went over things a couple times that			**Total: 9**	

	didn't necessarily need to be explained more than once. However, it wasn't a big issue, just something to work on for any future videos! Overall, I think that you did a really good job with your video and outline!
